

Internet Hotspot Solutions for Trade Shows

- ❑ Low cost Internet gateways that are simple to install
- ❑ Plug and play: the easy to use wizard speeds installation
- ❑ Custom login page with client branding, choose from 12 backdrops or create your own design
- ❑ Protect against lawsuits with the built-in disclaimer; the legal disclaimer can be edited
- ❑ Authenticated access uses codes that are generated and managed on the unit; no external RADIUS server is required
- ❑ A firewall protects the business network providing PCI DSS compliance
- ❑ Master bandwidth control, and individual bandwidth settings for each code
- ❑ Content filtering ensures a family friendly Internet service by blocking adult web sites
- ❑ Monitor Internet utilization through comprehensive reports
- ❑ Access code API for PoS and PMS applications
- ❑ Remote access and configuration
- ❑ Configuration backup and restore

Wireless Internet access is an essential part of doing business for trade show participants and visitors. Booth owners want Internet access to stay in touch with their offices and get access to business information that visitors ask about. Visitors also want wireless Internet for their smartphones.

Even though many people have 3G/4G smartphones with Internet access, large events such as trade shows usually swamp cell phone towers, limiting Internet access.

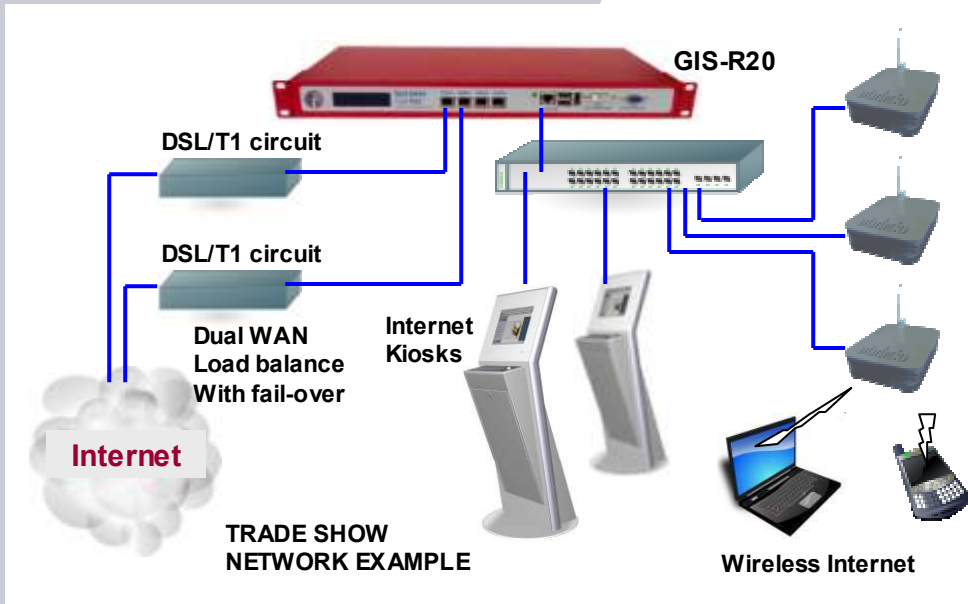

Wireless Internet service can be bundled with the booth costs to attract businesses to show their products. Booth owners can have free Internet access while visitors can be charged for Internet access using credit card billing.

Rent booth space quicker while covering costs: provide free Internet for booth owners and charge visitors for Internet use.

Cover the cost of providing free Internet for booth owners by charging visitors for Internet services using the gateway credit card billing feature.

Our gateway products include many management features essential for trade show Internet services. Features include bandwidth limiting, peer-to-peer blocking, content filtering and virus blocking. Comprehensive reporting includes daily and monthly usage, and billing reports with transaction charges.

We manufacture kiosk products for the trade show organizers who wish to create an Internet café environment for visitors. Please call our sales department if you wish to have more information about our kiosk products.

Easy to install, no special technical skills are required

Simple setup Wizard takes less than 5 minutes

Login page generator and custom login pages

Simple user interface: no complicated programming is required

SMALL TRADE SHOWS - GIS-R6
